DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112: •

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

In claims 1, 14-16, 18, 19, and 22-24, "the out side" lack antecedent basis.

Regarding claim 2, line 2, "a means" is indefinite, because no function is specified, it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

In claim 12, "the pressure-balancing means" lack antecedent basis and is indefinite.

In claims 3 and 13, line 2, claim 14, line 9, it is confusing what is "it" defined?

Claim 17 is indefinite because it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-9 and 12-24 are rejected under 35 U.S.C. 102(b) as being anticipated by

Mennesson (FR 2607786). Mennesson discloses, in figs. 1 and 4, a device comprising a cap 2 for closing a bottle having a nozzle with an opening. The cap comprises a stopper having taps and slots.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 10 and 11 rejected under 35 U.S.C. 103(a) as being unpatentable over Mennesson.

Mennesson is silent as to disclose the taps having lengths equal or longer than the nozzle. It would have been an obvious matter of design choice to have the tap length equal or longer as claimed in order to provide a desired stopper. A change in dimension, degree, size, etc. is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ .

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Barrett, Hoffman et al., Searles et al., Woodruff, Bitler, Parsons et al., Gray, Rigolot, Bartell, Nadel, Millan and Shigeru et al. teach toppers with slots.
